

ABBY SYEID

SENIOR SOFTWARE ENGINEER

United States | abby.syeid@gmail.com

CAREER SUMMARY

Senior Full Stack Engineer with 6+ years of experience building scalable web applications, backend systems, and AI-powered solutions using Python, JavaScript, and TypeScript. Experienced in developing robust applications with FastAPI, Django, Flask, React.js, and Node.js while designing RESTful APIs, microservices, and cloud-based architectures. Skilled in database optimization, AWS cloud services, Docker, CI/CD pipelines, and modern software engineering practices.

Experienced working as a Senior Full Stack Engineer at Malbek, developing enterprise-level applications and scalable backend services using Python and modern frameworks. Built full-stack solutions as a Full Stack Engineer for multiple client projects, delivering APIs, AI integrations, and automation workflows. Developed backend systems at Techverx with Python, Django, Flask, and database-driven applications. Strong experience in designing secure APIs, optimizing performance, and improving application scalability. Hands-on experience integrating LLM APIs and AI capabilities into production applications. Proven ability to collaborate with teams and deliver reliable software solutions in Agile environments.

EDUCATION

Bachelor's degree

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Backend: FastAPI, Django, Flask, *Node.js*, Express.js, RESTful APIs, GraphQL, Microservices, WebSockets

Frontend: React.js, Next.js, Redux, Vue.js, HTML5, CSS3, Tailwind CSS, Bootstrap

AI & Automation: OpenAI APIs, LLM Integration, AI-powered Applications, Prompt Engineering, AI Automation Workflows

Databases: PostgreSQL, MongoDB, MySQL, DynamoDB, Redis

Cloud & DevOps: AWS (EC2, Lambda, S3, CloudWatch), Docker, Kubernetes, Jenkins, GitHub Actions

GCP Services: Compute Engine, Firebase, App Engine

Architecture: System Design, Distributed Systems, Scalable Architecture, Performance Optimization

Testing: Pytest, Unittest, Jest, Cypress

Security: JWT, OAuth2, API Security

AI & Tools: OpenAI APIs, LLM Integration, GitHub Copilot

PROFESSIONAL EXPERIENCE:

Senior Full Stack Engineer | Malbek

Oct 2024- Present

- Designed and developed scalable full-stack applications using Python, FastAPI, React.js, and Node.js to support enterprise-level workflows.
- Built and optimized backend services, RESTful APIs, and microservices architectures for high-performance applications.
- Developed asynchronous processing solutions using Celery, Redis, and background job systems to improve application efficiency.
- Integrated AI capabilities and LLM APIs to automate workflows and enhance intelligent application features.
- Improved database performance by optimizing PostgreSQL queries, indexing strategies, and backend data processing.
- Deployed and maintained cloud-native applications on AWS using EC2, Lambda, S3, and Docker-based environments.
- Implemented monitoring, logging, and performance tracking using cloud monitoring tools.
- Collaborated with cross-functional teams to design secure, scalable, and maintainable software solutions.

- Mentored developers and contributed to architecture decisions, code reviews, and engineering best practices.

Full Stack Engineer | Independent Contractor

Jun 2023 – Sep 2024

- Developed full-stack web applications using Python, Django, FastAPI, React.js, and Node.js for multiple client projects.
- Designed and implemented RESTful APIs and GraphQL services supporting scalable application architectures.
- Built backend systems with Python for data processing, automation, and business workflow solutions.
- Integrated OpenAI APIs and AI-driven features to create intelligent automation and chatbot solutions.
- Designed database solutions using PostgreSQL, MongoDB, and DynamoDB with optimized queries and data models.
- Implemented CI/CD pipelines using GitHub Actions, GitLab CI, and Jenkins for automated deployments.
- Improved application reliability through testing, debugging, performance optimization, and secure coding practices.

Backend Engineer | Techverx

Sep 2020 – Dec 2022

- Developed backend services and APIs using Python, Django, Flask, and PostgreSQL for scalable web applications.
- Built and maintained RESTful APIs with secure authentication, validation, and optimized data processing.
- Designed database schemas, optimized SQL queries, and improved backend application performance.
- Implemented third-party API integrations and backend automation workflows.
- Collaborated with frontend developers to deliver responsive and high-quality full-stack solutions.
- Followed Agile development practices including sprint planning, code reviews, and continuous improvements.
