

BAHZAD KHAN

Prospect park,PA • (724)817-3948 • bahzadkhan625@gmail.com • github.com/devinnovator10

An experienced Full Stack Engineer with 10+ years of experience building and scaling production-grade web applications using JavaScript and Python-based backends. Proven expertise in designing RESTful and GraphQL APIs, developing responsive frontend interfaces, and deploying cloud-native applications on AWS, Azure, and GCP. Strong background in system design, performance optimization, and leading end-to-end development for high-impact products.

WORK EXPERIENCE

► Lead Full Stack Developer | Stack Pinnacle

April 2022 – Present

- Led the architecture and development of scalable full-stack applications using React, Node.js, Express, Flask, and Django. Maintained RESTful and GraphQL APIs supporting high-traffic applications.
- Built responsive, high-performance frontend interfaces with React, improving user experience and reducing page load times, and developed backend services using Node.js and Python, integrating with MongoDB and PostgreSQL for flexible and relational data storage.
- Deployed applications on AWS & GCP, implementing CI/CD pipelines for automated builds and releases.
- Implemented authentication, authorization, and role-based access control using JWT and OAuth.
- Mentored junior developers, conducted code reviews, and contributed to architectural decision-making.

► Senior Backend/ NodeJS Developer | DMI Tech Solutions

June 2019 – March 2022

- Developed end-to-end web applications, delivering clean, maintainable, and scalable solutions.
- Built backend APIs with Node.js, Express, and Python DRF to support web and mobile clients.
- Collaborated with product and design teams to translate requirements into intuitive user interfaces.
- Integrated third-party services such as payment gateways, analytics, and notification systems.
- Improved development workflows through better logging, error handling, and code quality practices.

► Software Developer | Game One

Jan 2015 – May 2019

- Developed and maintained JavaScript-based solutions for risk management, enabling accurate monitoring of financial transactions and ensuring compliance with data privacy and security standards.
- Automated data reporting processes using Python libraries, reducing report generation time by 60%.
- Worked with teams to implement predictive models, improving accuracy of credit risk analysis by 15%.

SKILLS

- | | |
|---|--|
| • Backend: Node.js, Python, GraphQL, Flask, Express.js, RESTful APIs, Microservices | • Frontend: ReactJS, NextJS, HTML5, CSS3, Architecture, Tailwind, Responsive Design |
| • Databases: PostgreSQL, MySQL, MongoDB | • DevOps: AWS, GCP, Azure, Docker, CI/CD |
| • Testing: Jest, PyTest, Unit, Integration Testing | • Version Control: GitHub, GitLab, Bitbucket |
| • Security: Authentication, Authorization (JWT, OAuth), Secure API Design, Data Protection | • Management: Jira, Asana, Monday, Notion, ClickUp, Teams, Slack |

EDUCATION & ACHIEVEMENTS

- | | |
|---------------------------------|-----------------------------------|
| • BS Software Engineering GCU | • Technical Excellence Award SP |
| • Best Team Player Game One | • Employee of the Year DMI |
