

MUSTAFA GOHAR

📍 Lahore, Punjab, Pakistan ✉ mustafagohar04@gmail.com ☎ 0326-9404567 🌐 in/mustafa-gohar-0a224a262

SUMMARY

Computer Science graduate with interests in Software Engineering, Artificial Intelligence, Machine Learning, and Data Science. Experienced in developing software solutions and applying technology to solve real-world problems, with a strong desire to continue learning and growing in innovative environments.

EXPERIENCE

- Implemented a visual similarity search system using computer vision techniques, allowing users to identify and discover matching apparel products through image-based queries.
- Integrated React Native frontend with Firebase Cloud Functions through REST APIs handling authentication and back-end business logic.
- Built an NLP chatbot supporting 3 languages using spaCy, Flask, and Google Translate API.
- Delivered real-time multilingual recommendations using external data sources.

Business Development Associate

4DX Digital

June 2023 – May 2024, Lahore

- Automated client onboarding processes using Salesforce CRM and custom Python scripts, reducing manual data entry time by 25%.
- Increased qualified lead conversion by 10% through lead-scoring logic and automated outreach workflows.
- Collaborated with technical teams and communicated AWS, Python, Node.js, and React-based solutions to clients.

PROJECT

Final Year Project: Drobe

Forman Christian College University • January 2026 – May 2026

- Designed and implemented a scalable backend architecture using Cloudinary and Firebase to manage user data and product catalogs, ensuring data integrity and efficient retrieval.
- Implemented a visual similarity search system using computer vision techniques, allowing users to identify and discover matching apparel products through image-based queries.
- Integrated React Native frontend with Firebase Cloud Functions through REST APIs handling authentication and back-end business logic.

Transaction Fraud Alert System

Semester Project • September 2025 – December 2025

- Developed a database-driven fraud transaction alert system to identify and flag suspicious banking transactions based on predefined risk criteria.
- Implemented SQL queries, stored procedures, and triggers to automate fraud detection.

Multilingual Chatbot for Travellers

Semester Project • January 2025 – May 2025

- Built an NLP chatbot supporting 3 languages using spaCy, Flask, and Google Translate API.
- Optimized API response times by implementing asynchronous calls to integrate weather, currency, and travel data sources.
- Delivered real-time multilingual recommendations using external data sources.

EDUCATION

BS Computer Science

Forman Christian College University • Lahore • 2022 – Present

- Relevant coursework: Machine Learning, NLP, Database Systems, Software Engineering.

A-Levels

Beaconhouse Defence Campus • 2020 – 2022

SKILLS

ML / AI: scikit-learn, spaCy, NLP, embeddings, model fine-tuning

Data: Python, Pandas, NumPy, Matplotlib, BigQuery, PostgreSQL

Web / Backend: Flask, React, Node.js, Firebase
