EDUCATION

National University of Computing & Emerging Sciences (FAST-NUCES)

Bachelor of Science in Software Engineering

August 2022 – May 2026

Lahore, Pakistan

International School Lahore

GCE A Level

August 2020 – May 2022

Lahore, Pakistan

RELEVANT COURSEWORK

- Data Structures & Algorithms
- OOP
- Database Systems
- Applied AI
- Data Science
- Cloud Computing
- Probability & Statistics
- Software Design & Analysis

EXPERIENCE

AICE XPERT Ltd.

July 2025 – November 2025

AI & NLP Intern

Lahore, Pakistan

- Architected a modular multi-agent LLM platform with pluggable memory and communication layers using LangChain and LangGraph, enabling systematic evaluation of 4+ collaboration architectures.
- Built orchestration and evaluation pipelines that cut inter-agent message overhead by 46% with zero degradation in task accuracy across all test scenarios.
- Built a full-stack AI landing page optimizer (React + Django) that scraped live websites and delivered real-time LLM-generated SEO recommendations with instant visual preview.
- Designed a proprietary A/B testing and analytics engine from scratch, enabling experiment tracking, content versioning, and performance benchmarking across client campaigns.

PROJECTS

Tachyon | Python, FastAPI, React.js, NLP, Transformer Models, LLMs, Ensemble Learning

July 2025 – May 2026

- Built an end-to-end multilingual fake news detection system supporting English, Urdu, Roman Urdu, and code-mixed text with a React/FastAPI interface for real-time verification.
- Designed a cross-LLM validation pipeline (GPT, Claude, LLaMA) using confidence-based ensemble voting; trained transformer models achieving 96% classification accuracy on a custom multilingual dataset.
- Engineered an automated video generation pipeline converting verified news into multilingual AI-anchor broadcasts for real-time dissemination.

Cairn AI | Next.js, TypeScript, FastAPI, LangChain, LangGraph, RAG, PostgreSQL, Docker

February 2026 - Present

- Architected a multi-agent RAG platform that connected to GitHub repositories via a GitHub App and answered natural-language codebase questions with citations to the exact file and line, using tree-sitter based chunking to preserve function boundaries, permission-filtered retrieval to restrict answers to repos the querying user could access, and webhook-triggered incremental re-indexing to keep results current on every push.

Legendary Motorsports AI | React.js, Node.js, Express.js, MongoDB, Redis, LangChain, LangGraph

April 2025

- Architected an AI vehicle intelligence platform combining MERN stack with LangGraph.js state machines for autonomous booking, using MongoDB Vector Search and Redis for RAG-based recommendations, and SSE for real-time AI streaming.

AgentForge | Python, LangChain, LangGraph, LLM, Pydantic, FastAPI, RAG

February 2026

- Built a multi-agent decision-intelligence platform (LangGraph + RAG) that ingests business data, runs tool-augmented analysis, and auto-generates churn risk scores with strategic recommendations, eliminating the need for manual analyst intervention.

AsaanLang | Python, React.js, Flask, TailwindCSS, Git

March 2023

- Designed and implemented an Urdu/Hindi-syntax programming language from scratch with grammar defined in BNF notation, transpiled via Python with a live web playground and CLI docs.

TECHNICAL SKILLS

AI/ML: LangChain, LangGraph, OpenAI API, HuggingFace Transformers, FinBERT, LSTM, RAG, Prompt Engineering

Backend: Python, FastAPI, Django, Node.js, REST APIs

Frontend: React.js, Next.js, Material UI, HTML/CSS

Data & Cloud: SQL, MongoDB, Firebase, TensorFlow

Languages: Python, JavaScript, Java, C++

Tools: Git/GitHub, Postman, Linux, Figma

Certifications: Generative AI Developer Certificate by HEC and Pak Angels, Frontend Developer Career Path by Scrimba
